Account No.: 14444

Quantity	Item ID	Description	UOM	Sell	Total
Yearly Recurring Charges					
<i>No change from Quote 17938 — existing licensing continues</i>					
Yearly Recurring Delta					\$0.00
One-Time Charges — Quote B Development					
150 – 300	DEVELOPMENT	Custom Programming — Quote B AI-Assisted Axle Measurement Stationary side-view AI auto-detection on the existing Jetson hardware. Operator role shifts from line-placement to confirm / override.	HR	\$180.00	\$27,000 – \$54,000
Hardware / Equipment					\$0.00
Yearly Recurring Delta					\$0.00

Quote B dev (low)	\$27,000.00
Quote B dev (high)	\$54,000.00
Quote B midpoint	\$40,500.00

ALL-IN TOTAL — If customer selects Quote B outright

Quote A (pilot site, per Quote 17938) \$44,469.55

Quote B dev (range) \$27,000 – \$54,000

All-in budgetary range \$71,469.55 – \$98,469.55**All-in midpoint estimate ~\$84,969.55**

Note: Dev cost is one-time across the entire rollout. Subsequent sites only need per-site hardware (~\$7,155) — software delivery does not repeat.

Billing: Time-and-materials; actual hours billed**Prerequisite:** Quote A in pilot at Van Fleet**DIVIDIA WILL DEVELOP CUSTOM SOFTWARE FOR E.R. JAHNA — PHASE 2 AI-ASSISTED AXLE MEASUREMENT.****About this estimate**

- Quote B builds on Quote 17938's Quote A hardware — same Jetson, same NVR, same cameras. **Software-only delta.**
- AI training data ideally sourced from operator-marked frames during Quote A pilot — zero additional labeling cost if planned for.
- Range reflects implementation uncertainty around AI accuracy threshold + training-data quality. Midpoint \$40,500 is the central estimate.
- Open items affecting this estimate: where the AI training data comes from (cheap — reuse Quote A frames, vs. expensive — label from scratch) and how confident the AI has to be before it runs the measurement (vs. handing off to the operator).

Disclaimer

This is a budgetary estimate, NOT a binding quote. Final pricing requires Quote A delivery, customer acceptance-criteria definition, and AI-confidence-threshold agreement.

50% down payment required prior to scheduling. Balance due upon completion of project.
